

HOBART at the iba in Munich

- **Broad product range for baking industry**
- **Machines and further equipment for washing of REUSABLES**
- **Booth: Hall A3, A3.341**

Offenburg, September 12, 2023 – Bakeries do not live by bread alone, they also sell plenty of coffee and other food items. That is why HOBART has been a reliable partner to the baking industry for decades and is showing its products at the iba in Munich. From October 22nd to 26th, you can see HOBART's reliable warewashing and food preparation technology for all company sizes in the baking industry at the world's leading trade fair for bakeries, confectionery and snacks.

Machines for every need

For bakeries, HOBART primarily offers the **UX/UP utensil washers**, designed to tackle the most demanding tasks. Various high-performance and cost-efficient machines are available, depending on the washing volume and the requirements on site - optionally as hood-type or as front door models.

The utensil washers of the PREMAX line are characterized by the innovative **side wash system**, in which large items and utensils are cleaned particularly efficiently and in an energy-saving manner. In addition to crockery, baking trays or baker's baskets, up to six GN-trays and four EN2 containers fit into the washing chamber at the same time - this is an unmatched HOBART innovation on the market! Due to the higher capacity for GN trays and bakery crates, this **dishwasher is more economical**. This saves up to 1,000 working hours per year. In addition, a special direct cleaning spray system and the patented **VAPO-ACTIVE steam washing** significantly reduce manual pre-cleaning while using the UP. It effortlessly removes the most tenacious dirt such as dried or baked-in dough residue.

The **PERMANENT-CLEAN automatic soil removal** in the **PREMAX AUP** hood-type dishwasher is indispensable for bakeries with lunch menus, as it immediately pumps all soil and dirt out of the machine. This eliminates the need for pre-rinsing of plates, and a long day of dishwashing without having to change the water while still maintaining absolutely hygienically clean dishwashing results is in reach. This not only saves operating costs, but also protects the device and the environment.

FUX – ideal machine for big baking enterprises

The HOBART FUX series rack and utensil washers are the ideal machines for medium-sized and large bakeries as well as canteens. The system offers the best dishwashing results and is characterized by exceptional performance and the lowest operating costs on the market.

The **FUX-C** is a compact container wash system which offers a capacity of up to 300 baking crates per hour. Furthermore, additional machine functions ensure a perfect wash result and help to reduce the water consumption.

The larger basket and utensil washer **FUX** washes up to 2.000 bakery crates or up to 10.000 reusable cups per hour. The intelligent **SENSO-SPACE compartment detection** registers empty spaces between items and regulates water consumption to a minimum.

REUSABLES – Cleaning solutions for reusable cups and dishes

Since January 1, 2023, most German food resellers have to offer reusable dishes for their customer's take-away food and drinks. Not only restaurateurs, but also members of the baking industry have to offer reusable cups and dishes. The HOBART experts know what is important when it comes to hygienic dishwashing and have developed a wide range of **washing and drying solutions for every need**. In order to achieve an optimal washing result, the machine, basket system and chemicals must be coordinated.

HOBART offers the right warewashing technology and the necessary accessories for a wide variety of reusable containers: From the small undercounter dishwasher to the large flight type dishwashing system, with integrated or external drying - the world market leader in commercial warewashing technology has a deep understanding of the topic of reusable containers and is available to the industry with guidance and support. At the iba, HOBART will be showing the FX and FP undercounter dishwashers with built-in **TOP-DRY technology** in a live demonstration in direct comparison. **Detergents** especially for plastic, specially developed basket systems such as the **reusable cup washing rack** or the **bottle rinsing system** complete the range.
